

12V Model
150PSI **I50/I51**

FEATURES:

1. Rapid Inflation: Completely inflate a tire in approx. 3 minutes (inflate standard 195/65R15 tire from 0 to 35psi), able to continue working for 30 minutes.
2. Intelligent Pressure-preset Function: Allow to preset the required air pressure for the tires on the digital tire gauge before inflation. The inflator will stop inflating once the pressure value has reached the preset value.
3. Unique Intimate Designs: Owing to the RoyPow exclusive design, the digital tire gauge can be detached from the tire inflator to measure the tire pressure independently.
4. Multi-purpose: 3 additional nozzles not only greatly adapt to all kinds of tires (car, truck, SUV, motorcycle, bike, etc.), but also fit to inflate sports balls (basketballs, footballs, etc.), camping equipments (rafts, air mattresses, etc.), toys (beach toys, pool accessories, etc.) and so on.

12V Model
80PSI **I80/I81**

FEATURES:

1. Compact & portable, easy to carry.
2. 80 psi peak air pressure for fast inflation. It only takes 7.5 minutes for inflating a 195/65/R15 Tire from 0 to 35 psi.
3. Short circuit protection. Over current protection.
4. Air compressors can be powered either by your car cigarette lighter socket (using our 10 feet cable) or by the car jump starter.
5. Equipped with the pressure gauge with LED illumination to avoid over-inflation even in the dark, which is very useful.
6. The original nozzle for the car tire comes with 3 additional nozzles for inflation of a ball, bicycle, motorcycle wheel and air bed, etc.
7. Air compressor can work continuously for 30 minutes.
